Colloids and Surfaces B: Biointerfaces 13 (1999) 341

COLLOIDS AND SURFACES B

Subject Index

Acylglycerol analogues, 37
Adiabatic compressibility, 157
Adsorption, 187
Affinity interaction, 325
Air–water interface, 167, 251
Alveolar surface tension, 59
Anesthetic action, 213
AOT, 1
Apolipoprotein, 221
Apolipoproteins, 233
Assembly, 105
Atomic force microscopy, 233

Bacterial agglutination, 241
Bacterial spores, 47
Bacteriophage T4 lysozyme, 167
Biomaterials, 287
Bovine PP3, 299
Bovine serum albumin (BSA), 203
Budding, 179

Carbamazepine, 263
Charged surfaces, 287
Charge-regulated membrane, 277
Chelates, 127
Chondroitinsulfate, 143
Circular dichroism, 157
Competitive adsorption, 251
Contact angle measurements, 143
Cryo-electron microscopy, 179

Detergents, 29
Dextran layer, 325
Differential scanning calorimetry, 47
Dipole relaxation, 13
Dissociable acidic function groups, 277
Distortion energy, 59
DMPC, 179
DNA condensation, 157
Donnan potential, 277
Dynamic interfacial tensions, 195

Electron donicity, 143
Electron microscopy, 311
Electrophoretic mobility, 277
Enzyme activity, 105
Erythrocyte membrane, 311

Film, 221
Folding, 105

Ganglioside interaction, 135
Gelatin, 187
General electrolyte, 277
Generalised polarisation, 13
Glutaraldehyde (GA), 203
Glyceryl trinitrate, 1
GOD, 105
Grinding, 263

Heat-induced lysis, 311
High density lipoprotein, 233
High density lipoproteins, 221
Human gastric lipase, 37
Human pancreatic lipase, 37
Human saliva, 241
Humic substances, 127
Hydrophilicity, 143
Hydrophobicity, 143

IgG, 187
Image analysis, 47
Immobilization, 325
Infrared spectroscopy, 299
Inhibition kinetics, 37
Interface, 221
Interfacial energy, 213
Interfacial film, 233
Isopropyl myristate, 1

Kinetic constants, 83
Kinetics of adsorption, 195

PII: S0927-7765(99)00052-1

Lactobacilli, 75
Lavages, 117
LB film, 105
Light scattering, 47
Lipid bilayer, 203
Lipid domains, 13
Lipids, 221, 233
Liposomes, 29

Membrane protein, 203
Metal ions, 127
Micelles, 1
Microanalysis, 47
Microcapsules, 287
Molecular modelling, 143
Molecular typing, 75
Monolayer penetration, 299
Monomolecular lipid films, 37
Multidrug resistance, 29

PEGylation, 287
Peptide–phospholipid interactions, 299
Percoll, 47
Phase behaviour, 13
Phase transition, 29
Phosphatidyl choline, 187
Phosphatidylcholine, 179
Phospholipids, 13
Phosphonates, 37
Photon correlation spectroscopy, 241
Plasma membrane, 135
Polymorphism, 263
Protein adsorption, 83, 251
Proteins, 195
Pulmonary surfactant, 117
Purple membrane, 213

Relative humidity, 263
Resistance modifying agents, 29
RIfS (reflectometric interference spectroscopy), 325

Salivary micelle-like globules, 241
Sequential and competitive adsorption, 167
Silica, 187
Silica particles, 83
Soft surfaces, 287
Spectroscopic ellipsometry, 325
Spreading, 221, 233
Surface area, 59
Surface characterization, 75
Surface concentration kinetics, 167
Surface free energy, 143
Surface pressure, 221, 233
Surface pressure kinetics, 167
Surface pressure movements, 135
Surface properties, 311
Surface tension, 117
Surface waves diffraction, 195
Surfactants, 195
Synthetic stability mutants, 167

Thermodynamic incompatibility, 251
Thermoporation, 311
Transdermal drug delivery, 1
Transformation rate, 263

Vesicle formation, 179
Volume and Recoil pressure, 59

Water, 213
Water/alcohol mixtures, 157

X-ray, 47

Yeast protoplast, 203

Zeta potential, 203
Zeta potentials, 241
